2005**

**INDIANA DEPARTMENT OF WORKFORCE DEVELOPMENT  
Strategic Research and Development  
Research & Analysis**

**Occupational Employment Statistics  
2005 Employment and Wage Data  
Economic Growth Region 3**

**A Labor Market Information publication of the Indiana Department of Workforce Development**

This publication is provided annually for each of Indiana's Metropolitan Statistical Area's (MSA), Economic Growth Regions and the State of Indiana.

The OCCUPATIONAL EMPLOYMENT STATISTICS (OES) survey has been collecting occupational employment data for over 20 years. This survey is a cooperative effort between the Indiana Department of Workforce Development and the U.S. Bureau of Labor Statistics. The OES program produces employment and wage estimates for over 700 occupations. These are estimates of the number of people employed in certain occupations, and estimates of the wages paid to them. These estimates are available for the nation as a whole, for individual states, and for metropolitan statistical areas (MSA's). Estimates from the OES are based on data collected using the Standard Occupational Classification (SOC) system.

The survey is a three year long project, collecting one-third of the sample each year. The full 3-year sample allows the production of estimates at fine levels of geographic, industrial and occupational detail. Beginning in 2002, the OES survey switched from industry coding based on the Standard Industrial Classification (SIC) system to that based on the North American Industry Classification System (NAICS). In November 2002, the OES survey changed from an annual survey to a semiannual survey of establishments. 2004 data were combined with the annual samples from 2002 and 2003.

**The OES program produces estimates of wages by occupation.** These occupational wage estimates are either estimates of mean wages or percentiles, such as the median wage. Wages for the OES survey are straight-time, gross pay, exclusive of premium pay.

>A **mean** wage is an average wage. An occupational mean wage estimate is calculated by summing the wages of all the employees in a given occupation and then dividing the total wages by the number of employees.

>A **median** wage is a boundary. An occupational median wage estimate is the boundary between the highest paid 50% and the lowest paid 50% of workers in that occupation. Half of the workers in a given occupation earn more than the median wage, and half the workers earn less than the median wage.

**The construction wages listed do not reflect "common" or "prevailing" wages for government contract purposes. For "common" wage data, please call (317) 233-1463.**

The response to this survey is voluntary. We would like to thank those employers who volunteered their time to complete the questionnaire. If you are an employer and receive an OCCUPATIONAL EMPLOYMENT STATISTICS survey questionnaire, your participation is encouraged and appreciated by all those who use this data for their activities.

If you need further information about your area, you may call the local analyst listed below. If you need labor market information for other areas, you will find a list of the local labor market analysts posted on our Internet website under *Resources*.

### Notes:

<sup>1</sup> Relative Standard Error (RSE) is a measure of the reliability of a statistic;  
the smaller the relative standard error, the more precise the estimate.

Percents do not total to 100 due to occupational data not reported.  
Blanks indicates that a wage estimate is not available,  
or indicates that an employment estimate is not available,  
or indicates a wage greater than \$70.00 per hour or \$145,600 per year,  
or estimate not released.

Estimates for residual, "All Other ..." occupations are not available.

**Need more Labor Market Information? See our WEB site.**

<http://www.hoosierdata.in.gov>

**Local Labor Market Analysts:** Local Area Analysts can generate customized reports by request, subject to the availability of the data, the scope of the project, and the current work load of the analyst.
